

TRAINING SOLUTIONS FOR LIFEPAK® 1000 DEFIBRILLATORS

LIFEPAK® 1000 DEFIBRILLATOR

Training Solutions

Physio-Control offers 3 flexible LIFEPAK 1000 defibrillator training solutions to meet your organization's unique needs.

Trainer 1000

The Trainer 1000 provides realistic training in a device that utilizes the same screen messages, audible tones and voice prompts as those found in the LIFEPAK 1000 defibrillator, but without live energy. Helps guide users-in-training through simulated analysis, energy delivery and prompted CPR intervals.

Target audience:

Large organizations with multiple training sessions or organizations without access to a LIFEPAK 1000 defibrillator for training. Also great for CPR/AED users who want more hands on training or more advanced BLS/ALS users who want practice using Manual Mode for defibrillation.

Benefits include:

- Train using simulated device that mimics LIFEPAK 1000 defibrillator features including cprMAX technology
- Wireless remote control enables dynamic custom training event
- Rechargeable trainer battery for cost-effective, high use training
- Your LIFEPAK 1000 defibrillator does not have to be taken out of service to conduct training

Training Simulation Package

The Training Simulation Package includes a patient simulator, spare battery and training electrodes at an affordable price to be used with your LIFEPAK 1000 defibrillator.

Target Audience:

More advanced BLS/ALS users want practice using ECG Monitoring Mode and/or Manual Mode*. Also, use for basic CPR/AED users who want hands-on training with a real defibrillator. Great for small groups.

Benefits include:

- Ability to train using a live AED with all features including cprMAX technology
- Flexibility to practice recognizing and responding to 17 different ECG rhythms
- Live switching from ECG Monitoring Mode to Manual Mode
- Practice using CODE-STAT™ data analytics software with stored data following simulation**
- No need to spend money on a separate training unit

*Note: must have a LIFEPAK 1000 defibrillator with ECG mode enabled

**Note: must have CODE-STAT analytics software and IrDA transmission cable, sold separately

AED Challenge

AED Challenge is an interactive, online AED/CPR refresher training tool for LIFEPAK automated external defibrillators (AEDs). It enables you to refresh your AED/CPR skills when and where you choose. Real-life scenarios give you regular practice and immediate feedback to help refresh and maintain your skills. Administrators can track training and adjust scenarios with included learning management tools. AHA/ERC 2010 Guidelines consistent.

Target Audience:

Basic CPR/AED users and organizations who want an easy way to track and manage user training. Covers the steps to follow when responding to a sudden cardiac arrest (SCA) emergency for either the professional or trained lay rescuer, using the LIFEPAK 1000 defibrillator in AED Mode.

Benefits include:

- Dozens of real-life scenarios
- Training on pediatric patients using Infant/Child Reduced Energy Defibrillation Electrodes
- Training using bag-valve mask
- Training on male or female adult patients
- Configuration options for cprMAX™ technology
